## PRESS RELEASE

Brussels, 19 February 2014

### Secure e-Government solutions across Europe

Explore better public services in Europe! If you travel a lot or do business across borders, visit our booth at CeBIT 2014.

Innovative, cross-border solutions developed by different Large Scale Projects (LSP)\* support the delivery of diverse electronic services for citizens and businesses across Europe.

There are various cross-border scenarios with a strong need for effective cross-border services.

- Are you involved in business activities abroad?
- Are you prepared for medical urgencies or the need for specific medication abroad?
- Do you have legal issues across borders?
- Have you experienced difficulties from a client in another country not paying a bill?

Large Scale Pilots build seamless ICT based solutions for those scenarios. They contribute to improving public services in the area of e-authentication and identification, e-justice, e-health, e-procurement, and electronic business set up in Europe. e-SENS, the “mother” of all LSP projects offers state-of-the-art technologies for eGovernment by collecting and consolidating previous achievements.

Experience cross-border scenarios and check our solutions in the week from 10<sup>th</sup> to 14<sup>th</sup> March in Hannover! Presentations, sliding monitor, interactive tools, and famous ice-cream bar will help to understand how we build ICT solutions for seamless electronic communication across Europe.

### LSP booth - Public Sector Parc in Hall 7, booth A40

\*Large Scale Pilots (LSP) - project developed and run under the ICT Policy Support Programme e-CODEX, epSOS, e-SENS. Already completed LSPs: PEPPOL, SPOCS, STORK.
