

Ministerie van Economische Zaken

# Technological enablers of modern administrations

Xander van der Linde

**ICTU**

*on behalf of the  
Ministry of Economic Affairs*

**ICTU**

**Connect** - across layers of government

**Trust** - by working together

**Interoperate** - facilitating cross border services

2 min. movie on cross border services – e-SENS

<https://youtu.be/DIIEVbBUtKY>

# Connecting layers of government

*city – regional – sectoral – national – cross border*

Safe, trusted transport of data

## Working together = Building trust

e-SENS pilots → form a 'coalition of the willing'

Dutch government organisations joining energy, knowledge and resources around eDelivery

- e-SENS LSP's like e-CODEX, eConfirmation & eProcurement
- CEF-calls for proposals
- a national project 'Gateway eDelivery'

## Dutch Gateway eDelivery

- Aiming at developing a national Gateway eDelivery
- To become part of NL government's generic digital infrastructure

# The Dutch Generic Digital Infrastructure

*A national infrastructure connecting layers of government digitally*

A basis for providing public services

- Authentication & Identification
- Service Provisioning
- Data management
- Interconnectivity

*Governed cross-sector and government-wide*

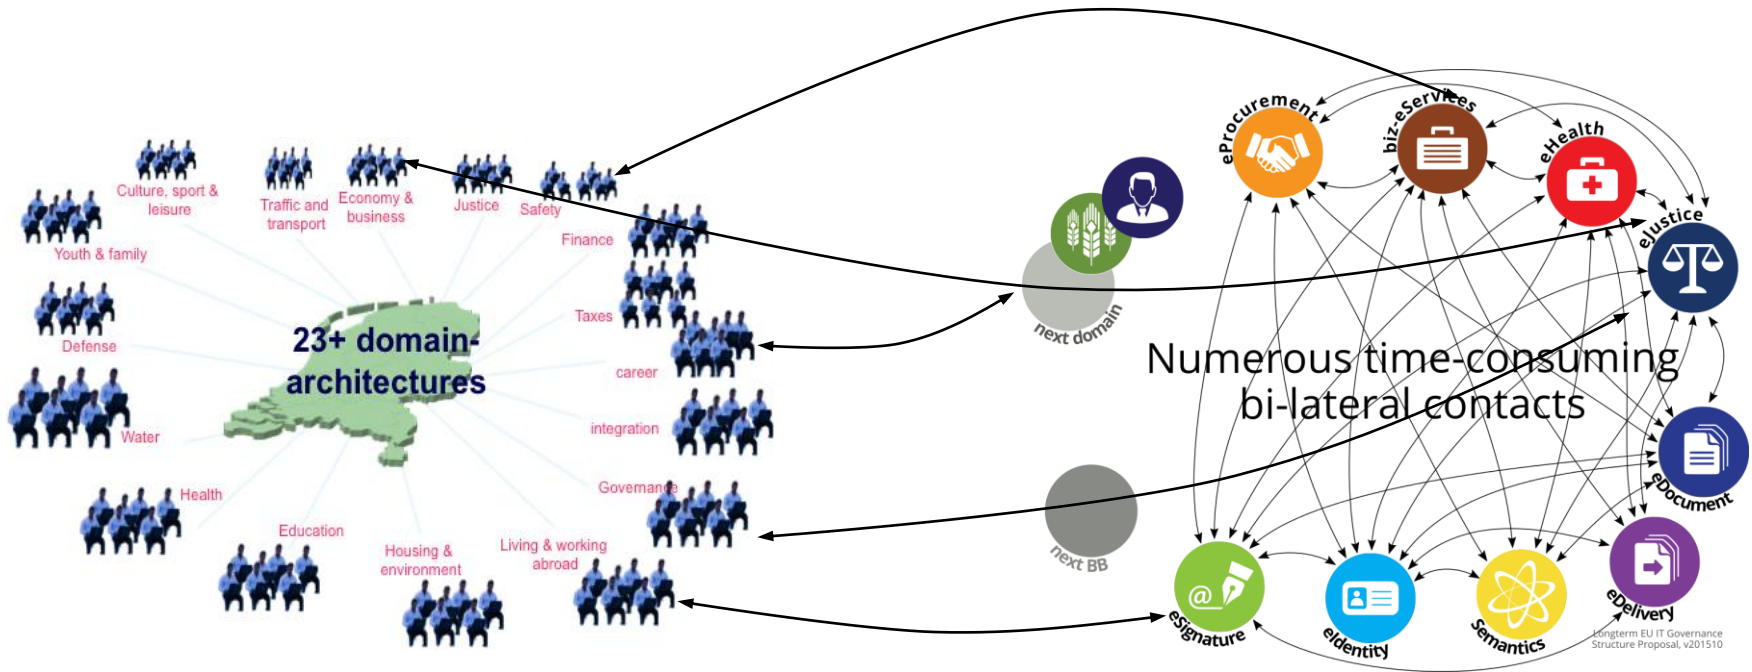

<https://www.digicommissaris.nl/english>

# Demand driven

## Towards a national generic eDelivery gateway

Longterm EU IT Governance Structure Proposal, v201510

## Some considerations at European level

- Often **other aspects** need to be arranged cross-border for success within use cases. F.i. **vocabularies of services** and of organisations.
- Getting to **work together with Public Administrations in MS** towards developing relevant digital cross border services for **citizens and businesses**
- The agreed **standards** need to be adhered and to be followed, also in different domains / DGs.
- Sustainability and **long term strategy** on European level.

**Thank you for your kind attention.**
